

Applicant : Peter S. MacLeod
Serial No. : 09/653,053
Filed : September 1, 2000
Page : 2 of 13

Attorney's Docket No.: 07844-357001 / P333

Listing of Claims:

1. (Previously Presented) A method comprising:
 - identifying a device color profile associated with a device; and
 - automatically selecting a rendering intent based on the color characteristics of the device, the color characteristics being defined by the device color profile.
2. (Original) The method of claim 1, wherein the device is a device to be emulated.
3. (Original) The method of claim 2, wherein the device is a printing press.
4. (Original) The method of claim 3, further comprising:
 - receiving a selection indicative of the device color profile.
5. (Previously Presented) The method of claim 3, further comprising:
 - determining a minimum luminance the printing press can produce; and
 - selecting one of a plurality of rendering intents based on a comparison of the minimum luminance to one or more predefined thresholds.
6. (Previously Presented) The method of claim 5, wherein selecting one of a plurality of rendering intents comprises:
 - selecting a first rendering intent when the minimum luminance exceeds a predefined threshold; and
 - selecting a second rendering intent otherwise.
7. (Original) The method of claim 6, wherein:
 - selecting a first rendering intent includes selecting a perceptual rendering intent; and
 - selecting a second rendering intent includes selecting a colorimetric rendering intent.

Applicant : Peter S. MacLeod
Serial No. : 09/653,053
Filed : September 1, 2000

Attorney's Docket No.: 07844-357001 / P333

8. (Original) The method of claim 7, further comprising:
receiving input data from a graphic arts application;
generating output data using the input data and the selected rendering intent; and
sending the output data to a proofing printer.
9. (Original) The method of claim 6, wherein selecting a first rendering intent includes selecting a composite rendering intent.
10. (Original) The method of claim 6, wherein selecting a second rendering intent includes selecting a composite rendering intent.
11. (Previously Presented) The method of claim 2, further comprising:
identifying an emulation device color profile associated with an emulation device;
wherein automatically selecting a rendering intent further comprises selecting a rendering intent based on the emulation device color profile.
12. (Previously Presented) The method of claim 11, wherein the emulation device is a device to generate the output of an emulation of the device to be emulated.
13. (Original) The method of claim 12, wherein the device is a printing press and the emulation device is a proofing printer, the method further comprising:
receiving a selection indicative of the printing press color profile; and
receiving a selection indicative of the proofing printer color profile.
14. (Original) The method of claim 13, further comprising:
selecting a first rendering intent when the difference between a minimum luminance the printing press can produce and a minimum luminance the proofing printer can produce exceeds a predefined value; and
selecting a second rendering intent otherwise.

Attorney's Docket No.: 07844-357001 / P333

15. (Original) The method of claim 14, wherein:
 - selecting a first rendering intent includes selecting a perceptual rendering intent; and
 - selecting a second rendering intent includes selecting a colorimetric rendering intent.
16. (Original) The method of claim 14, wherein selecting a first rendering intent includes selecting a composite rendering intent.
17. (Original) The method of claim 14, wherein selecting a second rendering intent includes selecting a composite rendering intent.
18. (Original) The method of claim 13, further comprising:
 - selecting a first rendering intent when a color gamut of the printing press is substantially contained within a color gamut of the proofing printer; and
 - selecting a second rendering intent otherwise.
19. (Original) The method of claim 18, wherein:
 - selecting a first rendering intent includes selecting a perceptual rendering intent; and
 - selecting a second rendering intent includes selecting a colorimetric rendering intent.
20. (Original) The method of claim 18, wherein selecting a first rendering intent includes selecting a composite rendering intent.
21. (Original) The method of claim 18, wherein selecting a second rendering intent includes selecting a composite rendering intent.
22. (Previously Presented) An apparatus comprising:
 - means for identifying a device color profile associated with a device; and
 - means for automatically selecting a rendering intent based on the color characteristics of the device, the color characteristics being defined by the device color profile.
23. (Original) The apparatus of claim 22, wherein the device is a device to be emulated.
24. (Original) The apparatus of claim 23, wherein the device is a printing press.

Attorney's Docket No.: 07844-357001 / P333

25. (Original) The apparatus of claim 24, wherein the means for identifying comprises:
means for receiving a selection indicative of the device color profile.
26. (Previously Presented) The apparatus of claim 24, further comprising:
means for determining a minimum luminance the printing press can produce; and
means for automatically selecting one of a plurality of rendering intents based on a
comparison of the minimum luminance to one or more predefined thresholds.
27. (Previously Presented) The apparatus of claim 26, wherein the means for selecting one of a
plurality of rendering intents comprises:
means for selecting a first rendering intent when the minimum luminance exceeds a
predefined threshold; and
means for selecting a second rendering intent otherwise.
28. (Original) The apparatus of claim 27, wherein:
the means for selecting a first rendering intent includes means for selecting a perceptual
rendering intent; and
the means for selecting a second rendering intent includes means for selecting a
colorimetric rendering intent.
29. (Original) The apparatus of claim 28, further comprising:
means for receiving input data from a graphic arts application;
means for generating output data using the input data and a selected rendering intent; and
means for sending the output data to the proofing printer.
30. (Original) The apparatus of claim 27, wherein the means for selecting a first rendering
intent includes means for selecting a composite rendering intent.
31. (Original) The apparatus of claim 27, wherein the means for selecting a second rendering
intent includes means for selecting a composite rendering intent.

Attorney's Docket No.: 07844-357001 / P333

32. (Previously Presented) The apparatus of claim 23, further comprising:
means for identifying an emulation device color profile associated with an emulation device;
wherein the means for automatically selecting a rendering intent further comprises means for selecting a rendering intent based on the emulation device color profile.
33. (Previously Presented) The apparatus of claim 32, wherein the emulation device is a device to generate the output of an emulation of the device to be emulated.
34. (Original) The apparatus of claim 33, wherein the device is a printing press and the emulation device is a proofing printer, the apparatus further comprising:
means for receiving a selection indicative of the printing press color profile; and
means for receiving a selection indicative of the proofing printer color profile.
35. (Original) The apparatus of claim 34, further comprising:
means for selecting a first rendering intent when the difference between a minimum luminance the printing press can produce and a minimum luminance the proofing printer can produce exceeds a predefined value; and
means for selecting a second rendering intent otherwise.
36. (Original) The apparatus of claim 35, wherein:
the means for selecting a first rendering intent includes means for selecting a perceptual rendering intent; and
the means for selecting a second rendering intent includes means for selecting a colorimetric rendering intent.
37. (Original) The apparatus of claim 35, wherein the means for selecting a first rendering intent includes means for selecting a composite rendering intent.
38. (Original) The apparatus of claim 35, wherein the means for selecting a second rendering intent includes means for selecting a composite rendering intent.

Attorney's Docket No.: 07844-357001 / P333

39. (Original) The apparatus of claim 34, further comprising:

means for selecting a first rendering intent when a color gamut of the printing press is substantially contained within a color gamut of the proofing printer; and
means for selecting a second rendering intent otherwise.

40. (Original) The apparatus of claim 39, wherein:

the means for selecting a first rendering intent includes means for selecting a perceptual rendering intent, and

the means for selecting a second rendering intent includes means for selecting a colorimetric rendering intent.

41. (Original) The apparatus of claim 39, wherein the means for selecting a colorimetric rendering intent includes means for selecting a composite rendering intent.

42. (Original) The apparatus of claim 39, wherein the means for selecting a perceptual rendering intent includes means for selecting a composite rendering intent.

43. (Previously Presented) A computer program product, tangibly embodied on a computer-readable medium, the product comprising instructions operable to cause a processor to:

identify a device color profile associated with a device; and

automatically select a rendering intent based on the color characteristics of the device, the color characteristics being defined by the device color profile.

44. (Original) The computer program product of claim 43, wherein the device is a device to be emulated.

45. (Original) The computer program product of claim 44, wherein the device is a printing press.

46. (Original) The computer program product of claim 45, further comprising: instructions to:
receive a selection indicative of the device color profile.

Applicant : Peter S. MacLeod

Attorney's Docket No.: 07844-357001 / P333

47. (Previously Presented) The computer program product of claim 45, further comprising instructions to:

- determine a minimum luminance the printing press can produce; and
- select one of a plurality of rendering intents based on a comparison of the minimum luminance to one or more predefined thresholds.

48. (Previously Presented) The computer program product of claim 47, wherein the instructions to select one of a plurality of rendering intents further comprise:

- instructions to select a first rendering intent when the minimum luminance exceeds a predefined threshold; and
- instructions to select a second rendering intent otherwise.

49. (Original) The computer program product of claim 48, wherein:

- the instructions to select a first rendering intent include instructions to select a perceptual rendering intent, and
- the instructions to select a second rendering intent include instructions to select a colorimetric rendering intent.

50. (Original) The computer program product of claim 49, further comprising instructions to:

- receive input data from a graphic arts application;
- generate output data using the input data and a selected rendering intent; and
- send the output data to the proofing printer.

51. (Previously Presented) The computer program product of claim 48, wherein the instructions to select a first rendering intent include instructions to select a composite rendering intent.

52. (Previously Presented) The computer program product of claim 48, wherein the instructions to select a second rendering intent include instructions to select a composite rendering intent.

53. (Previously Presented) The computer program product of claim 44, further comprising instructions to:

- identify an emulation device color profile associated with an emulation device;

Applicant : Peter S. MacLeod
Serial No. : 09/651,053
Filed : September 1, 2000
Page : 9 of 13

Attorney's Docket No.: 07844-357001 / P333

wherein the instructions to automatically select a rendering intent further comprise instructions to select a rendering intent based on the emulation device color profile.

54. (Previously Presented) The computer program product of claim 53, wherein the emulation device is a device to generate the output of an emulation of the device to be emulated.

55. (Original) The computer program product of claim 54, wherein the device is a printing press and the emulation device is a proofing printer, the computer program product further comprising instructions to:

receive a selection indicative of the printing press color profile; and
receive a selection indicative of the proofing printer color profile.

56. (Original) The computer program product of claim 55, further comprising instructions to:

select a first rendering intent when the difference between a minimum luminance the printing press can produce and a minimum luminance the proofing printer can produce exceeds a predefined value; and

select a second rendering intent otherwise.

57. (Original) The computer program product of claim 56, wherein:

the instructions to select a first rendering intent include instructions to select a perceptual rendering intent; and

the instructions to select a second rendering intent include instructions to select a colorimetric rendering intent.

58. (Previously Presented) The computer program product of claim 56, wherein the instructions to select a first rendering intent include instructions to select a composite rendering intent.

59. (Original) The computer program product of claim 56, wherein the instructions to select a second rendering intent include instructions to select a composite rendering intent.

60. (Previously Presented) The computer program product of claim 55, further comprising instructions to:

Applicant : Peter S. MacLeod
Serial No. : 09/653,053
Filed : September 1, 2000
Page : 10 of 13

Attorney's Docket No.: 07844-357001 / P333

select a first rendering intent when a color gamut of the printing press is substantially contained within a color gamut of the proofing printer; and
select a second rendering intent otherwise.

61. (Original) The computer program product of claim 60, wherein:

the instructions to select a first rendering intent include instructions to select a perceptual rendering intent; and

the instructions to select a second rendering intent include instructions to select a colorimetric rendering intent.

62. (Previously Presented) The computer program product of claim 60, wherein the instructions to select a first rendering intent include instructions to select a composite rendering intent.

63. (Previously Presented) The computer program product of claim 60, wherein the instructions to select a second rendering intent include instructions to select a composite rendering intent.
